

Antony Akinniranye

tonyakinn05@gmail.com | +1 (289) 314-2495 | github.com/tonyranye | Tayoakin.me

TECHNICAL SKILLS

Languages: Python, Java, SQL, C++, C, HTML/CSS, Dart

Tools & Tech: Linux, Git, Android Studio, NumPy, PyTorch

Core Competencies: Technical troubleshooting, device setup, UI/UX basics, data analysis, responsive design

EDUCATION

Ontario Tech University, Bachelor of Science in Computer Science Co-op

Sep 2023 – April 2027

Relevant Course Work: Data Structures and Algorithms, Scientific Data Analysis, Machine Learning Theory & Application

Member: Ontario Tech Computer Science Club, Fighting Game Club

PROJECTS | GitHub

Animal Identifier | A full PyTorch ML pipeline | Convolutional Neural Network | PyTorch

- Implemented data preprocessing, augmentations, batching, shuffled Data loaders, GPU compatible training loops.
- A full PyTorch-based image classification pipeline capable of identifying animals across multiple classes.
- Interface system to load.pth model weights and generate predictions using GPU/CPU environments.
- Organized project structure for scalability, enabling multiple trained models (dog breeds, butterflies, birds, cats) within a unified architecture.

Meteorite Landings | Data Visualization Python | Jupyter Notebooks | Pandas & GeoPandas | Matplotlib and Seaborn

- Programming in Python efficiently through data analysis and visualization libraries like Seaborn and Matplotlib.
- Analyzed the density of impact events recorded on each continent over the last few centuries.
- File reading data from CSV files.
- Developed using NumPy datasets, Matplotlib, and Seaborn visualization, the Visualization of meteorite impacts.

Portfolio Website | HTML, CSS, JavaScript | Responsive UI/UX Design | Front-End Development

- Designed and developed a fully responsive personal portfolio website using HTML, CSS, and JavaScript.
- Implemented modern UI/UX principles to improve usability, accessibility, and visual clarity across devices.
- Utilized Flexbox and CSS Grid layouts to ensure consistent structure on mobile, tablet, and desktop screens.
- Structured clean, modular code and reusable components to simplify maintenance and future feature updates.

Habit Tracker | Flutter & Dart | Android Studio | SQLite (sqflite) | Local Notifications

- Developed a mobile habit tracking application that allows users to create, edit, and delete custom trackers with titles, colours, and daily goals.
- Implemented persistent storage using a local SQLite database to store tracker details and historical progress.
- Designed an intuitive, responsive UI with forms and list views to make adding and managing habits simple.

WORK EXPERIENCES

Summer Student Groundskeeper | Otter Creek Co-operative Homes

June 2024 - July 2025

- Managed multiple projects which required planning, implementation, and maintenance. Optimizing task work by organizing a system workflow.
- Ensuring consistent monitoring and improvement over six weeks.

Food Service Aid | Taunton Mills

August 2021 - February 2023

- Communication: Accurately and promptly relaying and processing information to meet the customer's needs.
- Delivered high-quality customer service in a senior living environment quickly and efficiently.
